November 2020

Dear Sir/Madam

I am writing to say a big thank you for supporting the range of activities that were held at Gloucestershire Hospitals during National Healthcare Science week 2020. Although the large careers event on the Saturday had to be cancelled due to the Covid-19 pandemic, workshops throughout the preceding week still went ahead and provided a unique opportunity for students to see for themselves a wide range of Healthcare Science careers in action.

We are now planning for Healthcare Science Week 2021 and are intending to facilitate this using virtual workshops/information sessions from various departments. We are keen to ensure that even more students are given the opportunity to experience the many possibilities of Healthcare science through these sessions, which will be hosted by our very own Healthcare Scientists.

We will send you further information as it becomes available, but initially can you please make a note of the date, which is 8th – 12th March 2021. These sessions are aimed at students in years 10 and above, staff, parents/carers and career advisors. In order to help you understand the wide range of professions available within Healthcare Science you will be able to access as many sessions as you wish.

We look forward to your continued support in enabling your students to understand more about Healthcare Science within our hospital and to find out about the many different amazing and rewarding careers available to them.

Yours faithfully

Dr Tony Dix  
Head of Medical Physics  
& Lead Healthcare Scientist
